

## **INFORMATION SECURITY POLICY**

Our company, operating in the hotel textile industry, has established an Information Security system to protect the confidentiality, integrity, and availability of its information assets. In order to elevate this system to the highest level to support its strategic direction, our company has set the following policy:

- Providing the necessary resources to keep abreast of technological developments, innovations, and changes within the scope of the Information Security Management System,
- Managing information assets within processes, identifying risks associated with these assets, and implementing effective risk management by developing controls for these risks,
- Complying with current legal and other requirements related to Information Security, and ensuring Information Security requirements for internal and external parties,
- Fulfilling the applicable conditions determined within the scope of Information Security Management and continuously improving the Information Security Management System along with business continuity.
