

ENERGY POLICY

Our company, operating in the hotel textile industry, prioritizes increasing energy performance and continuously improving it for the management and employees. In line with the company's objectives and context, the company's management and all employees commit to the following principles to achieve energy goals:

- Procuring the necessary resources to achieve energy objectives and ensuring the most efficient use of these resources,
- Complying with legal and other requirements,
- Increasing energy performance by using existing energy and natural resources most efficiently in all our processes,
- Prioritizing energy-efficient products, services, and designs in procurement and design activities to improve energy performance.
